Career Objective

A goal oriented first principles engineer. Keen to understand how things work under the hood. With a great eye for detail.

EXPERIENCE

Sendmie app — *Messaging web app*

May 2022 - June 2022

https://sendmie.netlify.app

* I built a social web app using React.

* Easy and responsive UI for PC, Tablet and mobile view

* I made use of useState for state management

* I added a profile page and Chat page with the usage of useParams hook

* I implemented the use of React-Router as a means of navigation.

* I used framer-motion for page transitions and animations.

* I added a light and dark theme toggle switch

Gamersmart — *e-commerce web app*

June 2022 - July 2022

https://gamersmart.netlify.app

 * I created a gaming e-commerce website using React.

* I implemented the use of useReducer and Context API for the global state management.

* I used glassmorphism and Tilt.js as a major addition to the styling.

Intellico — *quiz app*

July 2022 - August 2022

https://intellico.netlify.app

– I built a Quiz app using React.

– I fetched the quiz data from an external API (Rest API) using the useEffect hook and async Function.

Programming Languages
